TO THE LADIES OF THE UNITED STATES: heceands of my country-women.

My success has excited the mulice of the envious and peaking, but their persecutions have served only to extend and establish my reportation. Showers of grateful offerings have fallen upon my reaching, from the fair seffectors whom I have relieved. So long as I smitch in affectionate and thankful remembrance by those who have experienced my skill, I can afferd to despise the efforts of muchief-make

cine for gredness memorrantics within the roach of the Ladies of the United States; but an indeposition to enter a field so occupied by quarks, with their permissions instrume, and a four that unprincipled condesfections might pain upon the public their worthless cuitations, have hither o pre-

vented me from establishing squences for the sale of my "AMIE DE FEMME," in the United States.

At last, I yield to the outeration of patients and friends, and offer to the suffering Femniles of America a modicine which has resolvend me somewhat famous throughout the Old World.

"This Campbellis"

and only my, that it is in liquid form, and to reactly such
as I have used in my practice in France, for many years, and
that it has never failed to secure a satisfactory result.

The same of them to morrow. Want of space forbids to-day. The "Anic de Femme" and meastranties stand in the re-lation of carse and effect. It is alike powerful to originate a healthy meastrand from where it never has origined, and to restore it where it has been from any cause suppressed. In order to quard against imposition, the wrapper of directions on each bottle of the "Amir de Femme", will bear my written signature, and both the lettle and enclosing box will be scaled with my private real.

Prior, \$3,50 a package.

The P. H. DICCHED

DR. P. H. RICORD. PARIS, January, 1857. For sale, Wholesale and Retail, by WILLIAM FISKE, No. 22 Supercer street, Corveland, who will supply the "Amor de Femme" at the Proprietor's praces.

E I. BALDWIN & Co. ROBES.—The greatest variety at re-We understand that the French Government has granted to the Atlantic Telegraph Company the exclusive right for fifty years to land telegraph. Cables on the islands of Micellon which lie between Nova Scotta and Newfoundland, in a direction about 30 miles southwest from the latter and about 200 miles distant from Sidney, Nova Scotta.

Having secured the right, it is proposed to run a cable from Flacentia Bay, N. F., to St. Pierre, the chief fish depot of the island, and thence to a point near Sidney, Cape Breton, Nova Scotta.

By this nocans the two French Islands will be the own into telegraphic communication with Enrop 1, while the Company will get rid of the necessity of keeping in repair some 400 or 500 miles of land line running across Newfoundland and Cape Bret 26, through regions where there are no inhabitants excepting a few scattered Indians, and no roads other than those which have been constructed by the Telegraph Company at its own expense. In a teording this liberal grant, the French Government doubtless had in view the advantages it must confer on its immuness interests which centre at St. Pierre, and which will thus be brought into daily and almost instantaneous communication with France.
